TECHNICAL SKILLS

- Frontend: React, TypeScript, JavaScript, HTML, CSS, Next.js, Redux
- Backend: Node.js, Python, FastAPI, Express, REST API, GraphQL
- Databases: PostgreSQL, MongoDB, Redis
- DevOps & Tools: Docker, Git, CI/CD, AWS, Agile, Scrum

WORK EXPERIENCE

Senior Full Stack Engineer — Apex Web Solutions (2021 - Present)

- Engineered responsive customer web portal in React and TypeScript with 99.9% uptime for 200,000 active users.
- Designed backend microservices using FastAPI and Node.js connected to PostgreSQL databases.
- Standardized Docker development environments, reducing new developer onboarding time by 60%.

Full Stack Developer — Kinetix Digital (2019 - 2021)

- Developed RESTful APIs and UI dashboards using React, Node.js, and MongoDB.
- Configured continuous integration pipelines using Git and automated testing suites.

KEY PROJECTS

CloudFleet Manager: SaaS vehicle tracking web dashboard with real-time WebSockets and React.
FastCommerce API: High-performance ecommerce REST API built with FastAPI and PostgreSQL.

EDUCATION

Bachelor of Science in Software Engineering, University of Illinois (2019)
