Priya Patel

Junior AI Researcher

priya.patel@example.com | +1 (555) 567-8901 | Austin, TX

PROFESSIONAL SUMMARY

Motivated Junior AI Researcher with 1.5 years of experience in computer vision, deep learning algorithms, and scientific research. Proficient in Python, PyTorch, OpenCV, and mathematical optimization.

TECHNICAL SKILLS

- Programming: Python, C++, MATLAB
- Machine Learning: PyTorch, OpenCV, Scikit-learn, Deep Learning
- Math & Theory: Linear Algebra, Statistics, Calculus, Optimization
- Tools: Git, Linux, Jupyter Notebooks

WORK EXPERIENCE

AI Research Assistant — Frontier AI Institute (2023 - Present)

- Assisted in training deep convolutional neural networks for semantic image segmentation using PyTorch.
- Benchmarked image augmentation techniques using OpenCV to boost model generalization on low-resource datasets.
- Authored research documentation and reproduced state-of-the-art vision models from academic papers.

KEY PROJECTS

Autonomous Lane Guide: Edge-deployed lane detection model using OpenCV and PyTorch.
Neural Style Transfer Studio: Interactive neural artistic transfer application built with Python.

EDUCATION

Bachelor of Science in Computer Science, UT Austin (2023)
