Sarah Jenkins

Site Reliability Engineer (SRE)

sarah.jenkins@example.com | +1 (555) 345-9012 | Portland, OR

PROFESSIONAL SUMMARY

Site Reliability Engineer with 5 years of experience ensuring 99.99% system availability across distributed microservices. Specialized in Linux, Kubernetes, Ansible, Prometheus, Python, and incident response.

TECHNICAL SKILLS

- Reliability & Systems: SRE, Linux, Kubernetes, Ansible
- Monitoring: Prometheus, Grafana, Datadog, ELK Stack
- Languages: Python, Bash, Go, SQL
- Infrastructure: Docker, Terraform, AWS, CI/CD

WORK EXPERIENCE

Site Reliability Engineer — Apex Reliability Labs (2021 - Present)

- Formulated and tracked Service Level Objectives (SLOs) and Error Budgets for high-traffic payment APIs.
- Wrote automated self-healing remediation scripts in Python and Bash for Kubernetes node failures.
- Led incident post-mortems and minimized Mean Time to Recovery (MTTR) by 38%.

Systems Administrator — Northwest Data Centers (2019 - 2021)

- Maintained fleet of 800+ Red Hat Linux servers and handled storage backup routines.
- Automated patching and configuration management using Ansible.

KEY PROJECTS

AutoHealer Pod: Kubernetes operator detecting memory leaks and recycling pods gracefully.
SLO Dashboard Suite: Grafana monitoring dashboards providing live latency and error budget tracking.

EDUCATION

Bachelor of Science in Computer Information Systems, Oregon State (2019)
