Vikram Malhotra

Senior DevOps & Cloud Architect

vikram.malhotra@example.com | +1 (555) 234-8901 | Raleigh, NC

PROFESSIONAL SUMMARY

DevOps Architect with 8 years of experience designing secure, highly available cloud infrastructures. Master of AWS, Docker, Kubernetes, Terraform, CI/CD, and Linux automation.

TECHNICAL SKILLS

- Cloud: AWS, Azure, GCP
- Containers & Orchestration: Docker, Kubernetes, Helm
- IaC & Automation: Terraform, Ansible, Bash, Python
- CI/CD & Monitoring: Jenkins, GitHub Actions, Prometheus, Grafana, Linux

WORK EXPERIENCE

Principal Cloud DevOps Architect — CloudScale Enterprises (2020 - Present)

- Architected multi-region AWS infrastructure with Terraform and Kubernetes hosting 50+ enterprise services.
- Built automated GitHub Actions CI/CD deployment pipelines, cutting release cycle times from weeks to minutes.
- Instituted Prometheus and Grafana observability stack with proactive alerting.

Senior DevOps Engineer — InfraCore Solutions (2016 - 2020)

- Migrated on-premise Linux server farm into containerized AWS Docker environments.
- Automated system configuration and package management using Ansible playbooks.

KEY PROJECTS

KubeDeploy Automation: Terraform module library deploying production-grade EKS clusters on AWS.
ZeroDowntime Pipeline: Blue-green deployment continuous integration workflow with automated rollbacks.

EDUCATION

Bachelor of Technology in Information Technology, IIT Kharagpur (2016)
